LOCAL

```
install.packages("devtools")
devtools::install_local("/Users/ragavahini/workspace-sdsu/starter/idepGolem", dependencies = TRUE,
upgrade = "never")
idepGolem::run_app()
```

Testing before packaging

cd electron

install all packages

This installs electron, electron-builder, cross-spawn, and wait-on

npm run start

Trouble shooting -

Test before Packaging

```
cd electron
Rscript app/run_app.R --port 7777 --host 127.0.0.1
```

Dev Testing

npm run start

Packaging

```
npm run prod-build
(npm run fix-rframework && npm run build)
```

lsof -i -P | grep 7777
